TED + CORDIS + OCDS — Statistics Report

Generated 2026-08-24 11:38 UTC

5794

Total articles / notices

2683

From TED procurement

2260

From CORDIS (EU R&D funding)

851

From OCDS (UK + Ukraine)

14/14

Verticals with data

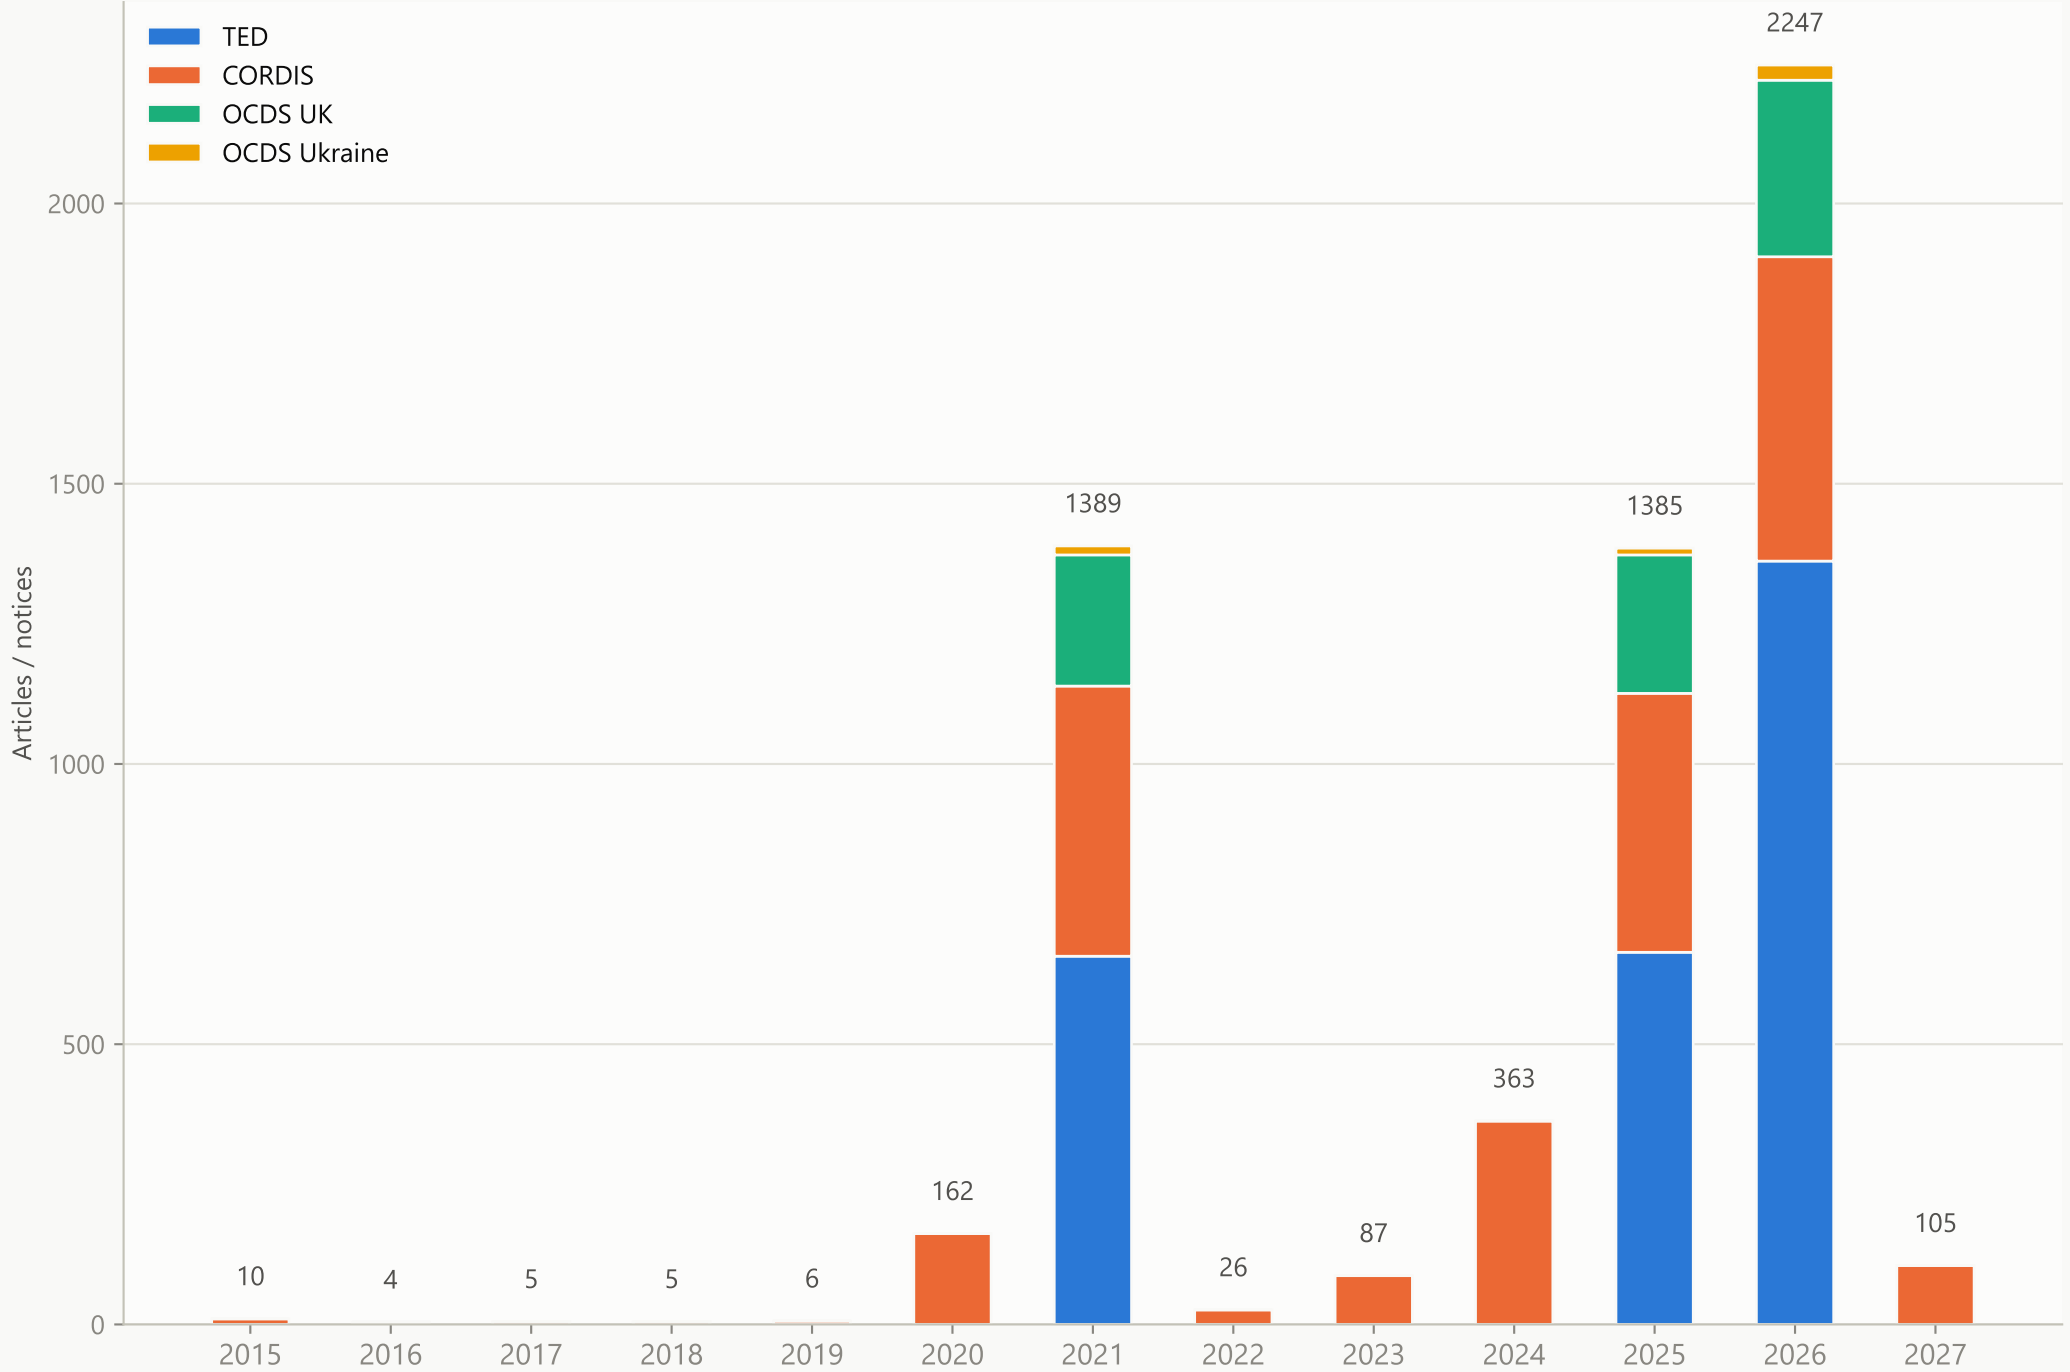

Scope: TED (EU public procurement, CPV-mapped), CORDIS (EU Horizon/H2020 R&D funding, legalBasis-mapped), OCDS UK (Find a Tender + Contracts Finder) and OCDS Ukraine (ProZorro), CPV-mapped via TED's own mapping. All four query active + ~1y-ago + ~5y-ago per vertical, all 14 verticals.

RSS and Google News are excluded from this report by request (paused/deleted sources) — their historical rows still exist in the DB, see `dark_corner.md`.

OCDS Australia (AusTender) has no live query API — confirmed dead end, 0 rows, not a bug. Patents (USPTO/EPO) are blocked on API credentials, not built yet.

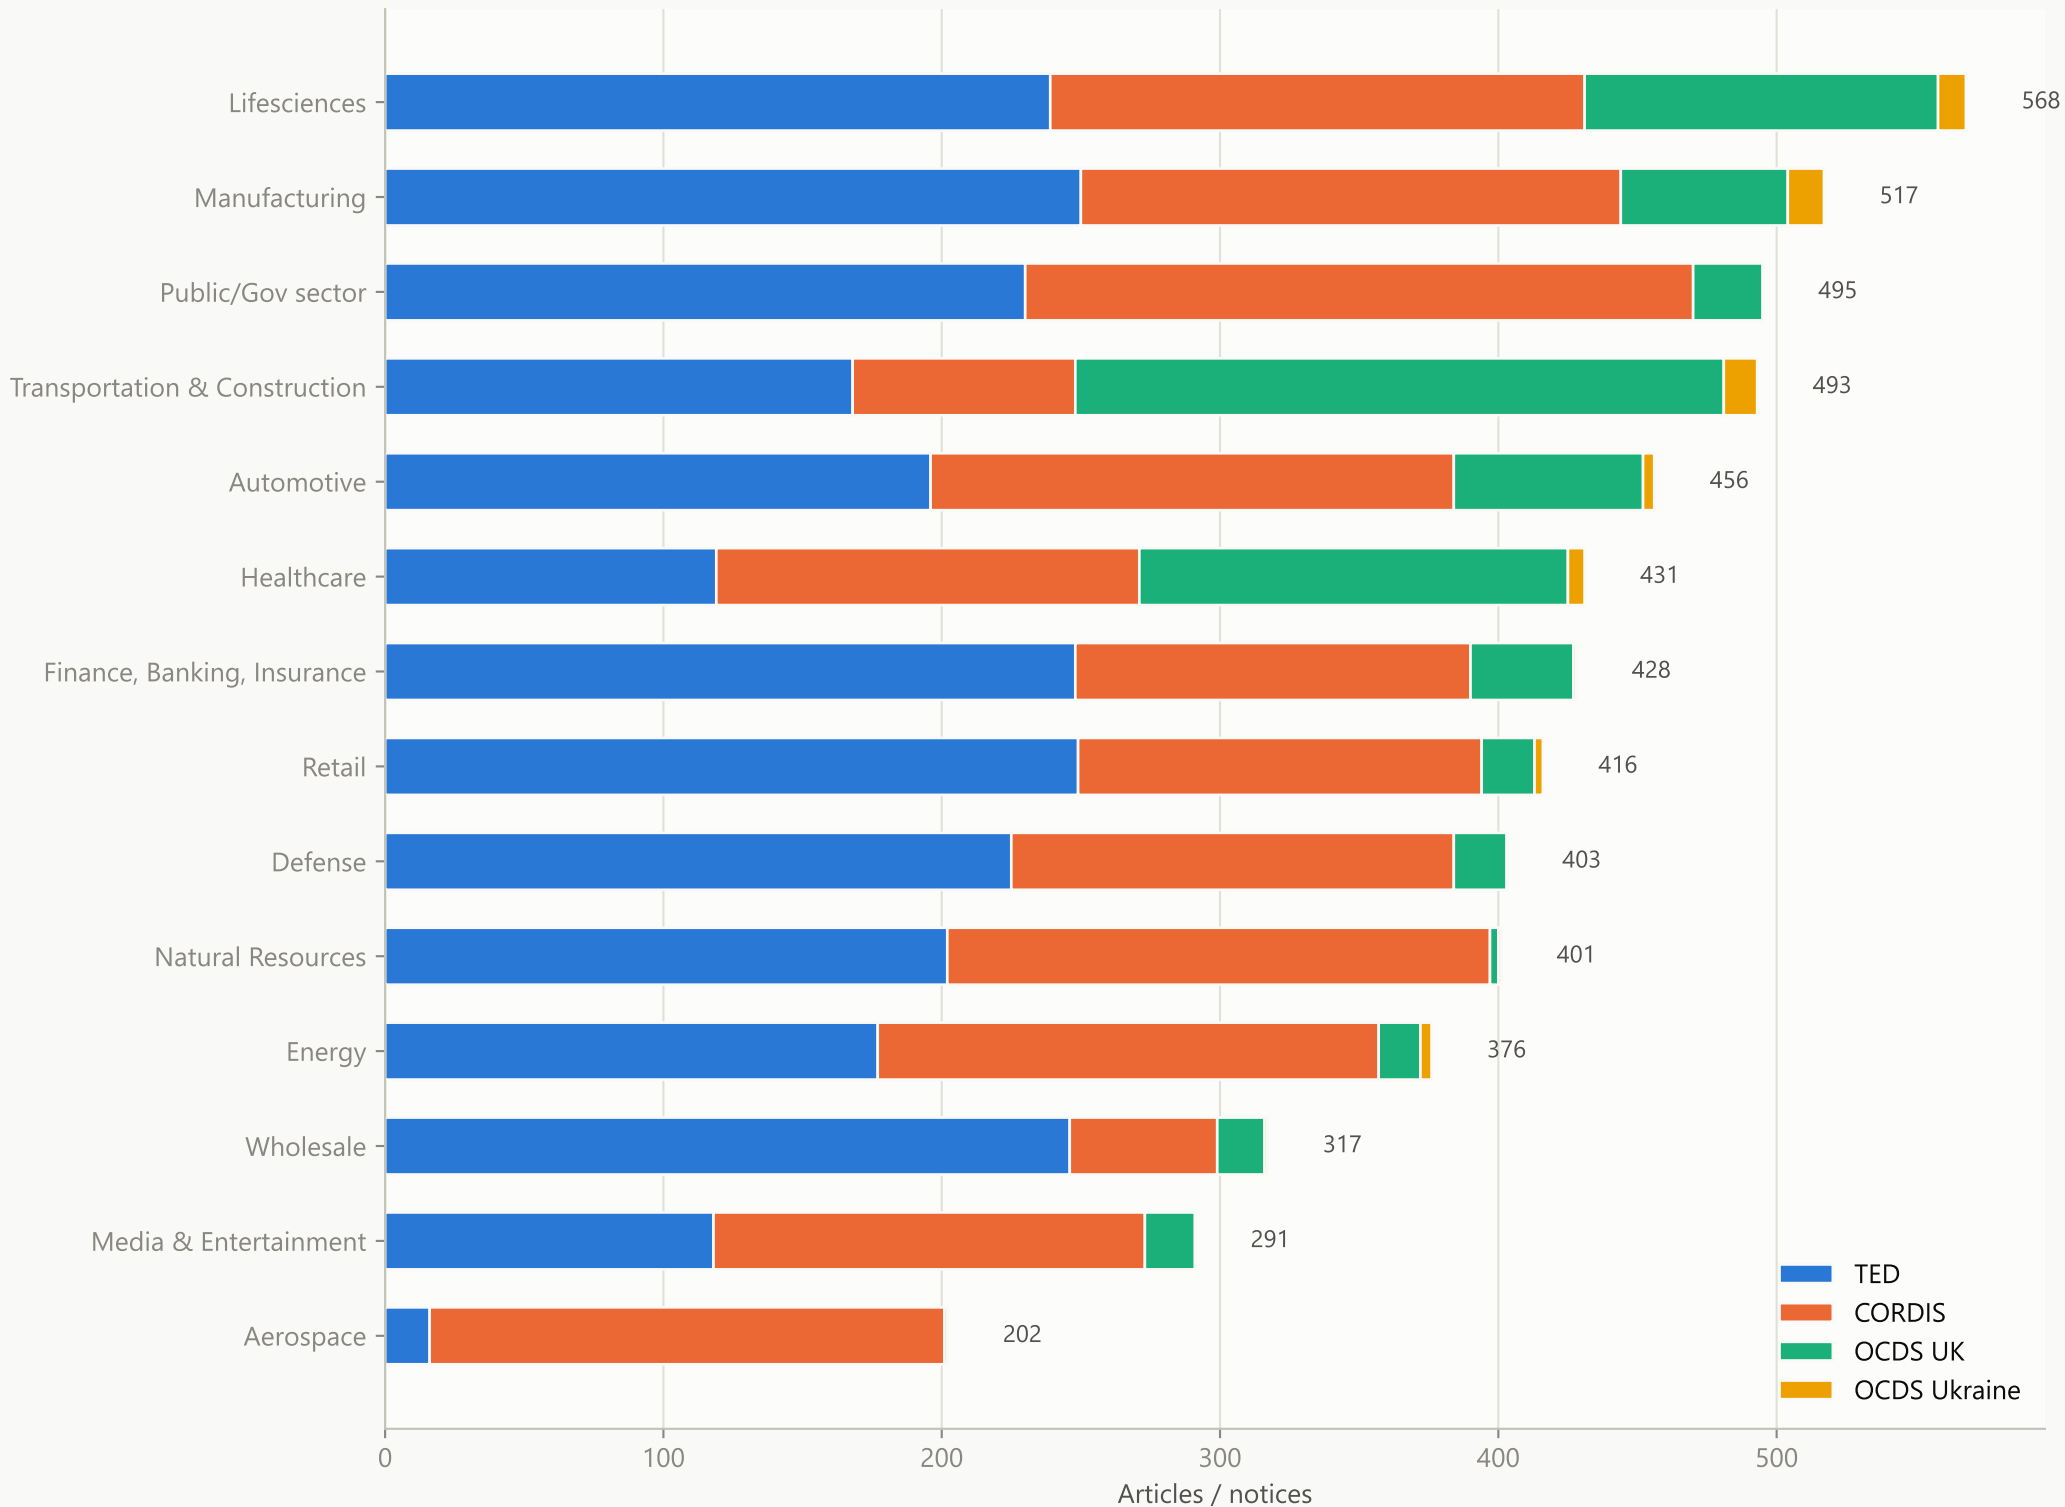

Confidence is a flat per-source trust signal (good/mid), not filtered — see the confidence page for the current per-source mapping.

Coverage by publication year

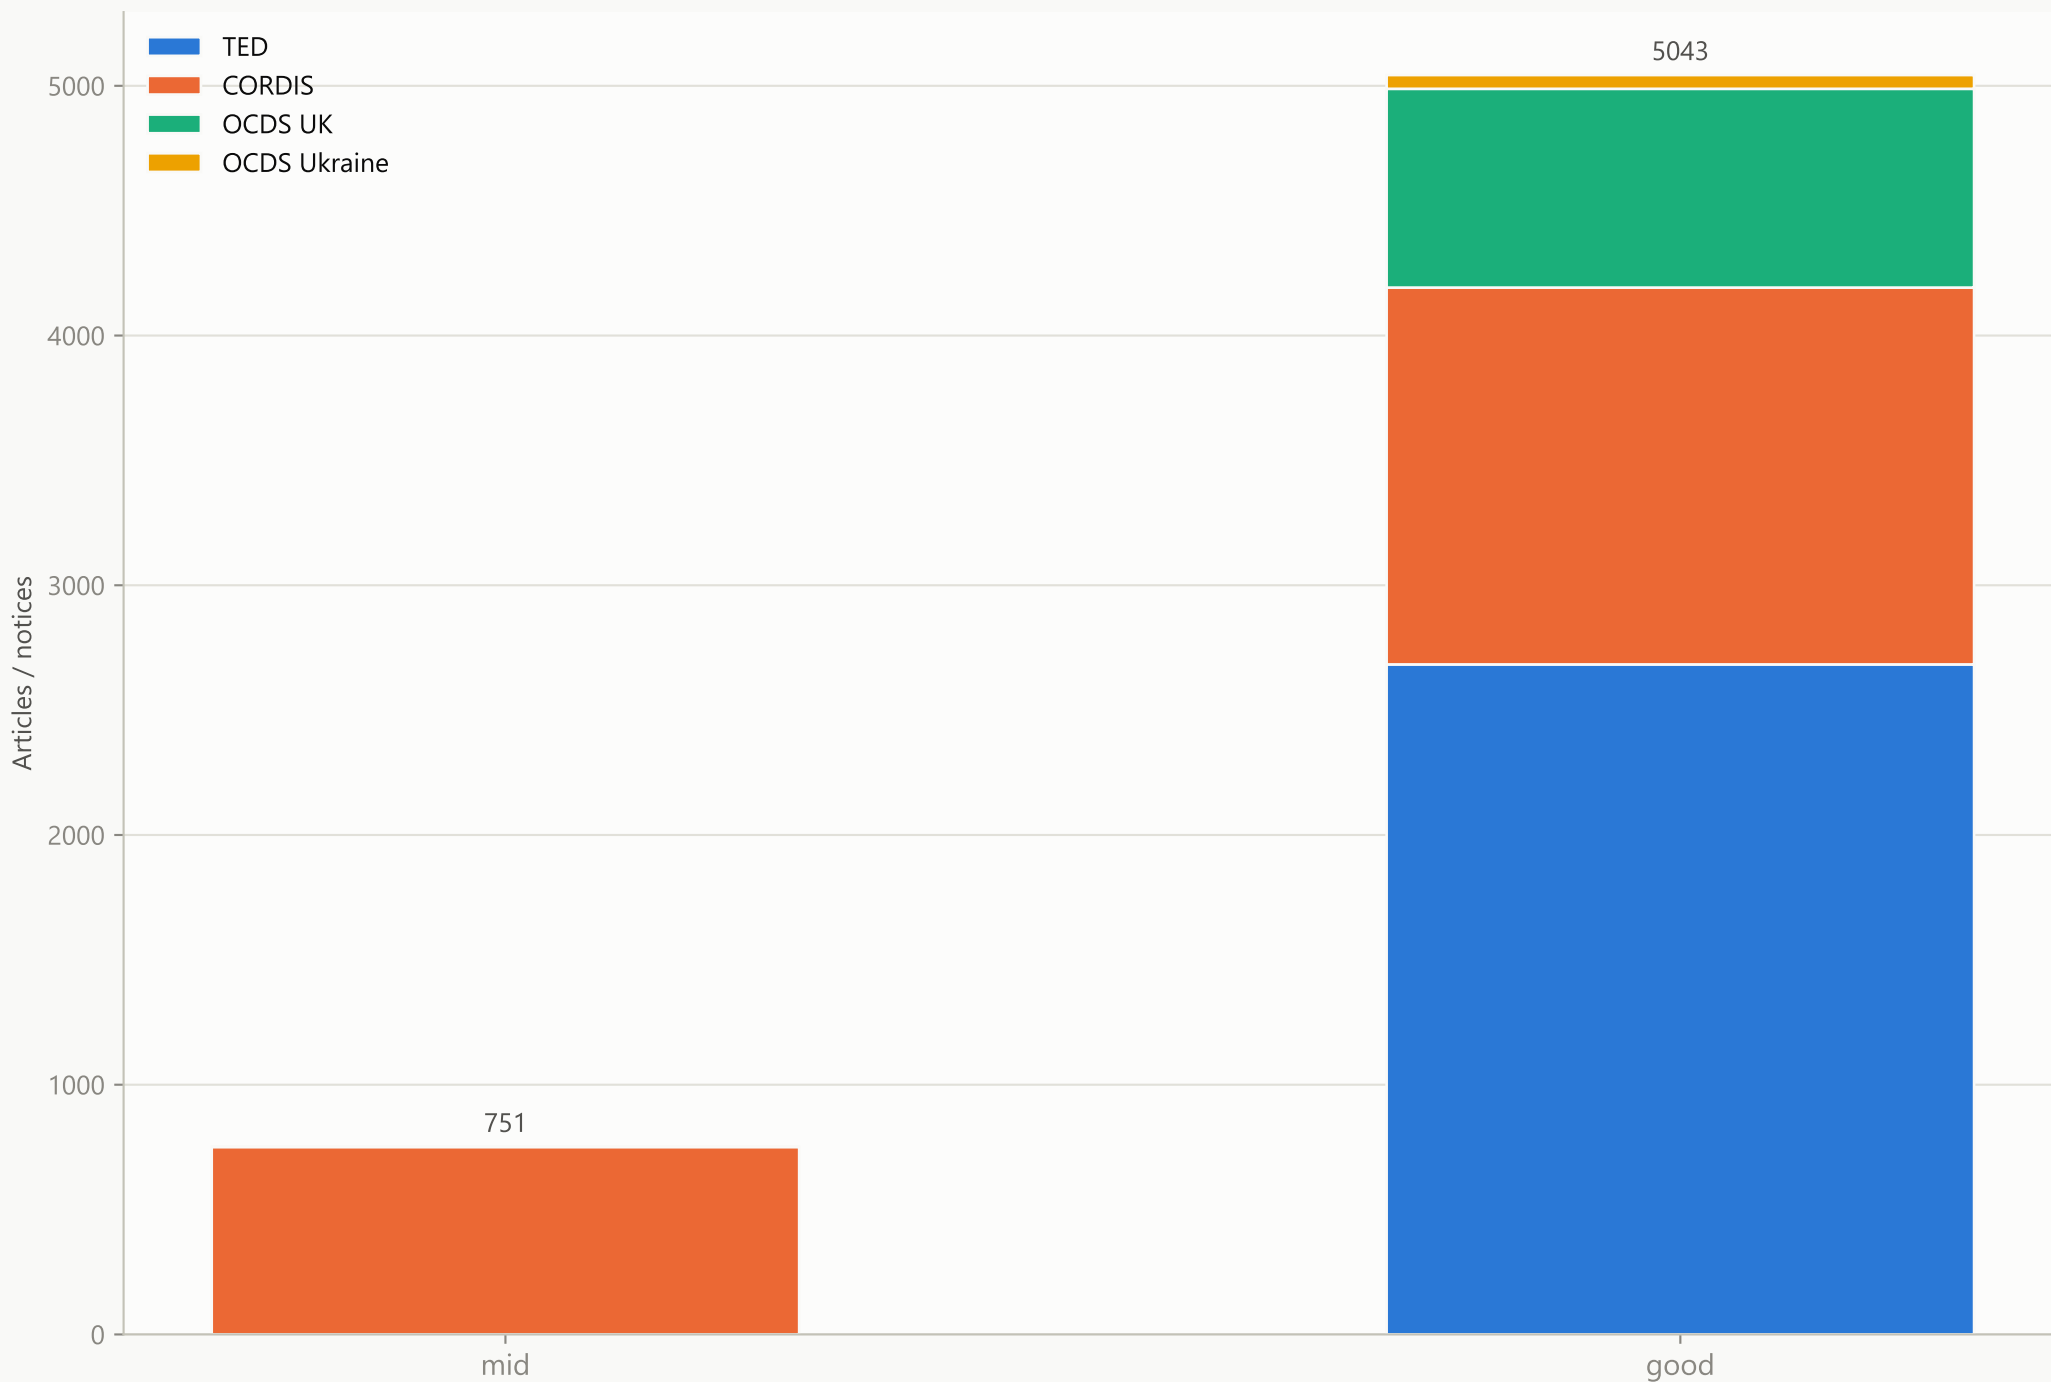

TED, CORDIS, OCDS and Google News are deliberately spread across time bands per run (active/recent, ~1 year ago, ~5 years ago), not just the most recent notices — older columns are that historical sampling, not a coverage gap. RSS is inherently recency-only (feeds only carry current articles).

Coverage by vertical

Coverage by confidence

Confidence is a flat per-source trust signal, not a per-vertical quality score. TED and OCDS are tagged "good" throughout; CORDIS is "good" for legal_basis/call_code matches and "mid" for its keyword-fallback tier (weaker signal — see dark_corner.md).
