Status breakdown: classified=883 (12%), no_match=5493 (73%), needs_review=1170 (16%)

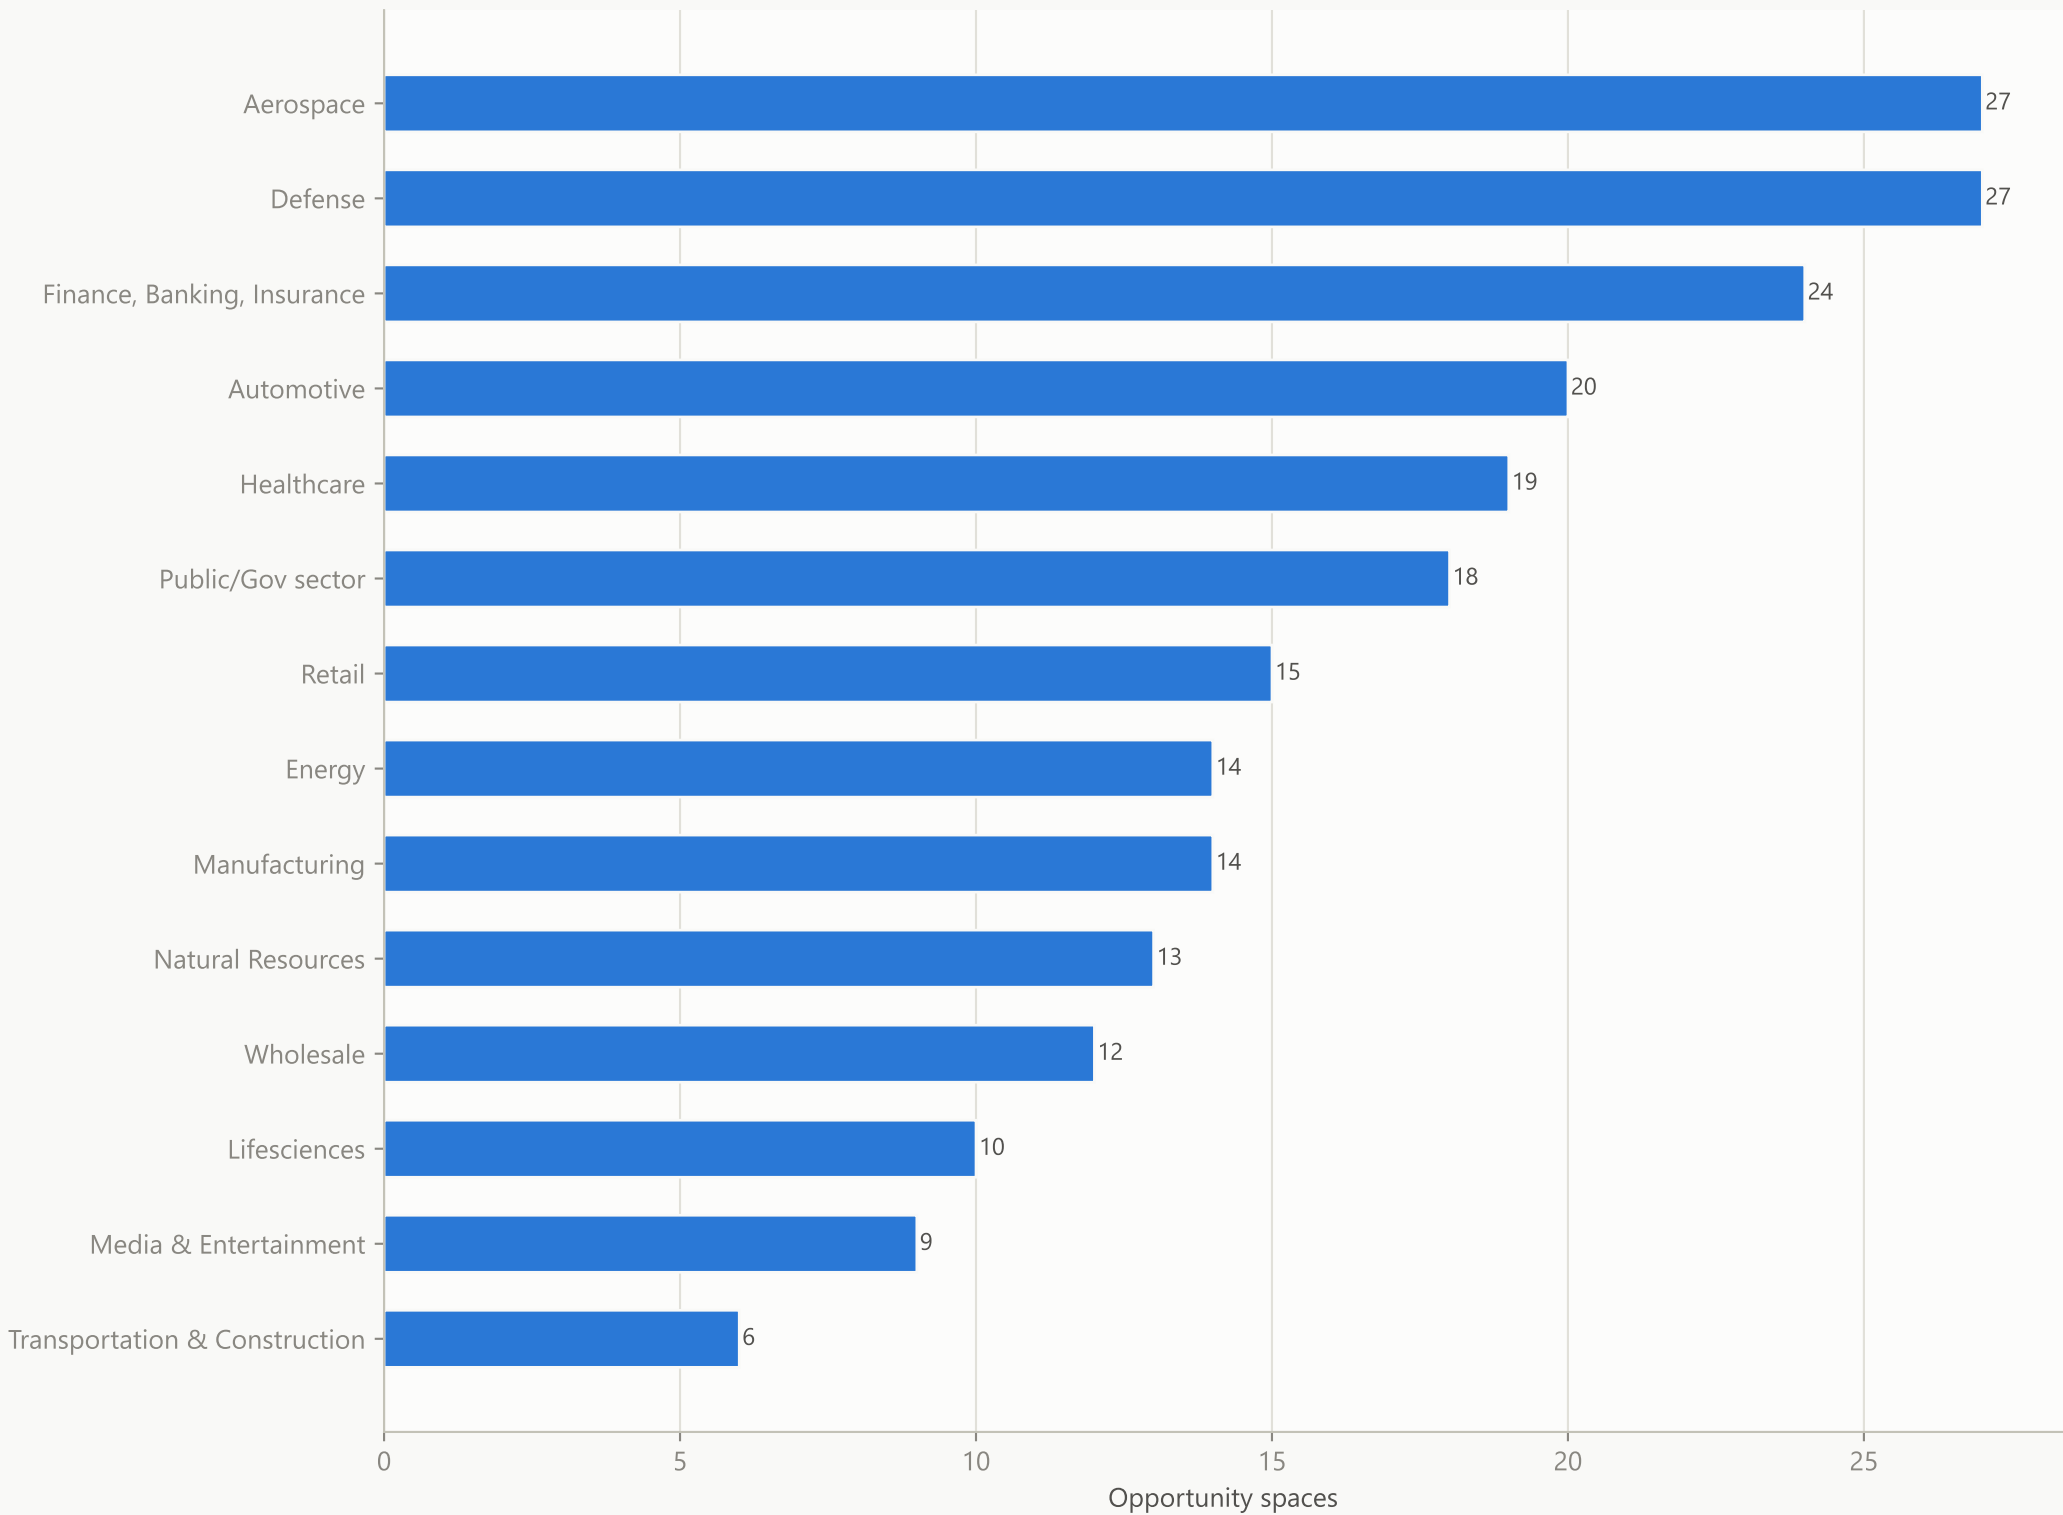

An opportunity space requires BOTH use_case and technology to be matched on the same article. Many 'classified' rows have only one dimension filled and don't form a space — of 883 classified rows, 368 article-links form the 228 complete triples below.

Token usage tracked so far: 8,860,393 tokens across 5686 rows.

Corpus: select_corpus.py's 600/vertical pool (TED backbone, CORDIS/OCDS fill the remainder, RSS backfills last, 2b-filtered, best-effort 50/25/25 recent/~1y/~5y mix).

RSS and Google News are excluded from this report by request — both are paused/deleted sources, not part of the pipeline going forward. Their classified data still exists in the DB (never deleted) and still appears in the underlying opportunity_spaces table, just not counted here. See dark_corner.md for why they were dropped.
